SNO-PARK PERMITS

Do you like to play in the snow, ski, snowboard, or snowmobile? Oregon’s Sno-Park permit program helps provide parking at many of your favorite winter recreation areas.

You must have a valid Sno-Park permit displayed in the windshield of your vehicle if you park in designated winter recreation parking areas (Sno-Parks) between November 15 and April 30. Each of these areas are posted with signs identifying them as a WINTER RECREATION AREA. You will find Sno-Parks in all mountain passes of the state as well as most recognized ski, snowmobile, and snow play areas.

Oregon’s Sno-park program is funded entirely by the sale of Sno-Park Permits. The program provides for snow removal in Sno-Parks and enforcement of the permit requirement. Any money remaining may be used for maintenance and development of Sno-Parks or carried over for use in a following year.

There are three types of permits: an annual permit which costs $15, a 3-day permit which costs $7, and a daily permit which costs $3. Permits are sold at all DMV offices and by permit sales agents in resorts, sporting goods stores and other retail outlets. Sales agents may charge an additional service fee for each permit they sell.

The cost of the annual permit provides a discount to frequent Sno-Park users over the three day and daily permits. A recent survey of Sno-Park users indicated that an annual permit is used more than 13 times per winter.

Sno-Park permits issued by Washington, California and Idaho are honored in Oregon and Oregon permits are honored in those states. (However, if your vehicle has Washington plates, you must have a Washington permit to park in a winter recreation area in Washington.) Parking in an Oregon Sno-Park without a permit may result in a $30 fine, so be sure to obtain a permit and display it on your vehicle.
TRACTION TIRE AND CHAIN REQUIREMENTS

When you travel during the snow season you must carry traction tires or chains in or on your vehicle and must use them when use is required by the signs posted. Under some conditions, four-wheel drive vehicles may be exempt from the requirements to use chains.

“Chains” include link chains, cable chains or another device that attaches to the wheel, vehicle, or outside of the tire that increases traction of a vehicle under ice or snow conditions. A “traction tire” is a studded tire or any other tire that meets tire industry definition as suitable for use in severe snow conditions. Studded tires can be used in Oregon from November 1 to April 1. These dates may be changed, however, by the Department of Transportation when conditions warrant.

Operating a vehicle that is not equipped with proper traction tires or chains when required, is a Class C traffic infraction. For more information on Oregon’s chain and traction tire requirements, go to ODOT’s travel web page at www.tripcheck.com.
OREGON SNO-PARKS

Most of Oregon’s Sno-Parks are on U.S. Forest Service land. The land managers provided the information on activities available at or near each Sno-Park for this brochure. Questions on the activities available or to obtain trail maps please contact the appropriate land manager. A list of Sno-Park land managers is included on page 17.

WINTER DRIVING CHECKLIST

Traveling in Oregon’s snow country can be hazardous, especially if you are caught in a severe storm. The following checklist will help you be prepared in case you must travel during heavy snow.

Check your car—
Before leaving on a trip, you should check your car for the following:

• Is there sufficient anti-freeze in your radiator?
• Are the windshield wipers in good condition, and is the reservoir filled with winterized washer fluid?
• Are the muffler and exhaust system in good condition? A leaking exhaust system can fill a closed car with carbon monoxide gas.
• Is the gas tank filled? Long waits during storms are common.
• Is the defroster in good working order?

Extra equipment—
The following items will help you in case of an emergency, such as getting stuck in a snowbank:

• Small shovel.
• Flares.
• Bag of sand, rock salt or a skid mat.
• Ice scraper and brush to remove ice and snow from your vehicle.
• Rags or paper towels to clean the windshield.
• Battery booster cables.
• Warm, waterproof clothing, boots and gloves.
• Blankets.
• Flashlight with extra batteries.

Remember! Oregon’s weather can change rapidly, so be prepared. Call ahead for road conditions at 1-800-977-6368. This toll-free number is available from all areas in Oregon. When calling from outside Oregon, dial 1-503-588-2941. You may also access road conditions and highway cameras statewide by going to ODOT’s travel web page at www.tripcheck.com
