## BUSINESS IN THE STATE OF OREGON

### Explanation

The next several pages show the accounting results of each company for each line of insurance as categorized in the financial reporting format required. These categories do not provide information about some specific insurance coverages -- such as products liability -- or classes of insureds -- such as houses less than five years old. These figures are accounting data intended for use in evaluating the financial condition of each company.

Comparing premiums and losses in this format provides only a rough indication of how appropriately priced each line of business may be for all companies combined. The results reported for a single line, company, and year are subject to considerable statistical variance as well as artificial mechanics of account procedures..

"Direct" is the term used to describe insurance transactions between the insurance buyer and insurance company before or without regard to, reinsurance transactions among insurance companies.

"Premium written" is usually defined as premium billed by property and casualty companies. Rules of life insurance accounting require reporting premiums actually collected. This item is a measure of marketing activity in this state for the year.

"Premiums earned" is constructed from premiums written this year and in previous years, and in some instances, premiums to be written in the future for current coverages. It is approximately the pro rata portion of the premium charged for each policy, for the portion of coverage provided, within the calendar year.

"Losses paid" is the sum of all payments made during the year to, or for, the benefit of insurance claimants. These payments include amounts paid in the current year for claims arising from coverage in prior years, and exclude amounts which will be paid in future years for claims arising from the current year. Hence, this item is not a measure of the actual cost of current coverages, but only of current cash flows.

"Losses incurred" equals losses paid, plus an estimate at the close of the year of the amounts to be paid in the future for all claims arising from the current and all prior years, minus the corresponding estimate made at the close of business for the preceding year. If these estimates were to be exactly correct, then losses incurred would be the actual cost of all claims arising from coverage provided during the current year. Incurred losses reported include estimated amounts unpaid for incurred-but-not-reported (IBNR) claims.

"Dividends paid" is the amount paid to policyholders under participating agreements. These dividends are paid policyholders after coverage for which they paid premiums has expired. The premiums corresponding to the coverage periods for which dividends have been paid in the current year are almost entirely written and earned one to two calendar years before. Hence, dividends paid in 1986 are not strictly comparable to 1986 premiums. Dividends paid to company stockholders are not included.

"Loss ratio" equals losses incurred divided by premiums earned. This is the best accounting representation of the portion of each premium dollar which has been needed to honor the company's promise to pay claims. The figures shown are subject to many artificialities of insurance accounting, such as those explained above, as well as considerable statistical variation between years and among companies.

The permissible or acceptable loss ratios differ according to the organization and marketing methods used by each company, the line of business, and the particular coverage within a line. Fidelity and surety insurance companies, for instance, expected to be infrequent and the insurers

have recovery rights. Title companies also provide a loss prevention service with infrequent losses expected.

The reports for property and casualty and life companies were obtained from the National Association of Insurance Commissioners (NAIC) in Kansas City, Missouri. Responsibility for reconciliation of this data lies with the NAIC.

For informational purposes, the Oregon experience of non-authorized (unlicensed) insurance companies is shown separately. ORS 744.345 allows a licensed "surplus lines" agent under certain circumstances to place business with companies other than those authorized by the Insurance Commissioner to do business in Oregon. Since these companies are authorized by the regulator of some other state, or country, the NAIC receives their annual statement.

A list of authorized insurers is available on request from the Insurance Division as a separate publication. Data contained herein for fraternal, health care contractors, mortgage guaranty and title companies have been manually compiled by the Insurance Division.
